

Customer Support

Global Network | Parts | Human Resources

Doosan service is like many others only a phone call away, but the difference is your local Doosan service company will know you by name and will be able to respond quickly when you need.

No long distance call centres and more importantly, we have thousands of fully equipped and factory trained mobile engineers across the globe.

All Doosan machines are built with serviceability in mind and by using the latest industrial engines and applying our philosophy of more metal than plastic, we can keep your servicing costs down to a minimum and reduce your damage and out of contract costs.

We aim to provide the highest levels of service at affordable costs with a local agent you can rely on and local parts availability.

We hold a large stock of popular new machines in our PDI facilities in the US, Europe and elsewhere. Our Parts Distribution Centres are fully stocked with all the parts you need throughout the life of your

forklift and we actively encourage end users to visit our offices to see first-hand our products and after-sales support we offer to all our customers.

Doosan Genuine Parts offer unrivalled reliability and productivity and are guaranteed to ensure you make the most of your investment.

About Doosan

Values that drive our future growth

Trust in people is the foundation on which Doosan has built its century of success

Doosan always put 'people' first for the past 100 years, based on our management philosophies. "Business is not meant to make profits, but to help people grow." (Late Too Pyung Park, First Chairman), and continues to spur corporate development with global competitiveness originated from human resources.

Doosan the oldest, but fastest growing company

Doosan has recorded the longest business history since its inauguration in 1896, but has grown at its most rapid pace for the past 10 years.

Doosan-the global Infrastructure Support Business (ISB) company

Doosan is creating 90% or more of its sales in ISB Business through vigorous reorganization of business portfolio since 1998. The past 70% of business has concentrated on consumer goods, but we have successfully transformed our business DNA to the infrastructure support business that constructs and reinforces social infrastructure.

Doosan, surging as a global company

Doosan has become the global ISB leader based on its world class products and services. In addition, as a true global company, Doosan's overseas employees encompass 50% of its human resources, and overseas sales take more than over 60% of the total sales.
